General Nurses in Specialist Settings

How Do We Get Ophthalmic Nurses? The UK Perspective.

Stephen Craig. Senior Lecturer, Northumbria University. Newcastle Upon Tyne, UK
UK Nursing History

- 1844 – Florence Nightingale travels to Kaiserworth, Germany to train as a nurse.
  - She lasted 3 months
- 1854 – Travels to Scutari, Turkey as ‘Superintendent’.
- 1860 – Nightingale School of Nursing opens.
  - 15 hand picked students!
- 1860 - Nightingale publishes "Note on Nursing: What it is and what it is not”
  - Still in print today!
UK Nursing History

• 1916 – (Royal) College of Nursing Founded.

• 1919 – Nursing Act passed (not law until 1923)
  – Nurse ‘Number One’ Miss Ethel Gordon Fenwick
  – General Nursing Council formed.

• 1948 – NHS founded.

• 1952 – Ophthalmic Nursing Board founded.
The Briggs Committee was established in 1970 to consider issues around the quality and nature of nurse training and the place of nursing within the NHS, rather than regulation.

It reported in 1972 and recommended a number of changes to professional education. Almost as an afterthought, Briggs also recommended the replacement of the existing regulatory structure (involving nine separate bodies across the United Kingdom) with a unified central council and separate boards in each of the four countries with specific responsibility for education.

Six years of debate and delay followed before the modified Briggs proposals formed the basis of the Nurses, Midwives and Health Visitors Act 1979. This was due to the need to take account of devolution, treasury misgivings, lack of consensus within the professions [especially from midwives], and a lack of government will to find the parliamentary time to enact the legislation.
UK Nursing History

• The United Kingdom Central Council Founded (UKCC) (1982)

• The NMC Scope of Practice (1994)

• Nurses, Midwives and Health Visitors Act (1997)
  • The title ‘Nurse’ is protected by law.

• The NHS Plan (2000)
UK Nursing Change

- English National Board (ENB) abolished (2002)
- The Nursing and Midwifery Council (NMC) succeeds UKCC (2002)
- The NMC Code (2008)
- *So where do Ophthalmic Nurses come from?*
Ophthalmic Nursing History

- 1952 - Ophthalmic Nursing Board founded.

- Ophthalmic Nursing Diploma (OND)

- Students could enter at 17 yrs of age
  - 3 ‘O’ levels, one of which one must be English.

- 18 months course.
  - ‘Pre-Reg’, Inclusive of 6 months reduction in SRN training or 12 months reduction in SEN training.
  - ONC available for SEN’s

For
Ophthalmic Nursing Diploma & Proficiency Certificate

1979

SYLLABUS
A OPTHALMIC NURSING DIPLOMA
(For State Registered Nurses and Pre-Registration Students)

The syllabus aims to provide the learner with a sound and co-
ordinated knowledge of the theory and practice of ophthalmic
nursing. A basic knowledge of ophthalmology is required, sufficient
to allow the learner an intelligent understanding of the nursing
procedures.

The syllabus shall include the following:

Structure & Physiology
The Orbit — bones and surrounding structures
The Eyelids
The Lacrimal Apparatus — tear formation and drainage
The Extra-Ocular Muscles
The Conjunctiva
The Sclera
The Cornea
The Trabecular Meshwork and Canal of Schlemm
The Uveal Tract: Iris, Ciliary Body, Choroid
The Aqueous Humour — its secretion and drainage
The Lens; the Zonule; Accommodation; Presbyopia
The Vitreous Humour
Intra-Ocular Pressure
The Retina
Visual Pathways
The Optic Nerve
The Cranial Nerves and Autonomic Nervous System
The Arteries and Veins of the Orbit and Face
How it was.....

Basic Optics
Light as a directed ray; reflection and refraction
The role of Mirrors, Lenses, Prisms
Emmetropia
Refractive error: Myopia, Hypermetropia, Astigmatism
Spectacle lenses to correct refractive errors, presbyopia
Contact Lenses
Intra-Ocular Lenses

Diseases and their Investigations and Treatment involving:
Lids and Lacrimal Apparatus
Extra-Eye Muscles
Conjunctiva
Sclera
Cornea
Uveal Tract
Anterior Chamber Angle & Trabecular Meshwork
Lens
Vitreous
Retina
Optic Pathway
Orbital Contents
Ocular manifestations of systemic diseases

Practical Nursing Experience
This will be gained in Adult and Children’s Wards, Accident and Emergency and Out-patient Departments and Theatre to meet the requirements set out in the Record of Practical Instruction.

N.B. Those undertaking the pre-registration course will spend a period of training on night duty.

Microbiology
Organisms found in and around the eye - pathogenic and commensal.
Taking of specimens for investigation; culture media.

Pharmacology
Drugs in current use in the treatment of ocular disease.
The effects and possible side-effects of these drugs.
Usual dosage, and routes of administration.
Care and custody of drugs.

Special Needs of the Ophthalmic Patient
Mobility: escorting the blind patient.
Occupational Therapy.
The role of the Medical Social Worker.
Rehabilitation of the newly blind or partially-sighted patient.

Lecture Requirements
The minimum number of lectures which should be given is as follows:

- Structure & Physiology
- Diseases of the Eye
- Medical & Surgical Treatment
- Ophthalmic Nursing — Theory and Practice
- Surgical Techniques — Major and Minor
- Pharmacology & Microbiology

* At least half of these lectures should be given by Medical Staff (of consultant or registered specialist grade).
B PROFICIENCY CERTIFICATE
(For Nurses on the General Roll of the GNC)

Following the pattern set out for the Ophthalmic Nursing Diploma, basic instruction will be given in:

- Structure & Physiology of the Eye and its Adnaxa
- Elementary Optics
- The Investigations and Treatment of common Ocular Diseases
- Microbiology
- Pharmacology
- The Special Needs of the Ophthalmic Patient

Practical Nursing Experience
This will be gained in adult and childrens wards, Accident and Emergency and Out-Patient Departments and Theatre to fulfil the requirements set out in the Record of Practical Instruction. A period of night duty is included in the training programme.

Lecture Requirements
The minimum number of lectures which should be given is as follows:

- Structure & Physiology
- Diseases of the Eye
- Medical & Surgical Treatment
- Ophthalmic Nursing — Theory and Practice
- Surgical Techniques — Major and Minor
- Pharmacology & Microbiology

EXAMINATION REGULATIONS
Examination for the Ophthalmic Nursing Diploma

Part I
This is a written examination consisting of:

i. Three questions set by medical members of the examination board.
ii. Three questions set by nursing members of the examination board.

The candidate is required to answer two questions from each section. The time allowed for the written examination is two hours.

Part II
This is an oral and practical examination. It includes:

i. Nursing procedures conducted by a nursing examiner for 30 minutes.
ii. An oral examination conducted by a medical examiner for 15 minutes.

N.B. The Record of Practical Instruction must be available to the Examiners.

Current UK Nurse Education

• Three years (minimum 4600 hours)
  – Northumbria University do 5200 hours

• Full or Part Time

• 50% Theory / 50% Practice

• Inter-professional and Shared Learning

• Joint Awards

• Learning in all settings – able to practice confidently in both hospital and community

### Key

- All Pre Registration Health Studies Programs
- Program Specific Shared Modules Across Programs
- Field Specific Modules
- Generic Nursing Modules
Northumbria University’s pre-registration nursing programmes have become the first in the country to be accredited by the Royal College of Nursing (RCN).

The accreditation covers all four fields of nursing: adult, child, mental health and learning disabilities at Bachelor and Masters level.

In adult ‘branches’, we have 400 students / year, or 1200 over a three year period.
## Local Numbers

### Sunderland Hospitals
- 970 Beds
- Theatres - 2 Students
- Ward – 3 Students
- Twice a year – 10 total

### Newcastle Hospitals
- 1,800
- Theatres – 4 Students
- Ward – 4 Students
- Day Unit – 3 Students
- Twice a year - 22

Maximum in any one year is 32. Students cannot repeat a placement.
Issues

- Less than 100 out of 1200 students in a three year period access Ophthalmology.

- Curriculum is general and lacks a specific ‘sensory’ component.

- Financial constraints limit CPD

- Hospitals prefer ‘in-house’ informal training.

- No longer a recognised ‘registerable qualification’
Recommendations

• Review availability of Ophthalmology as a Learning Zone.

• Engage partner organisations in education in valuing Ophthalmology as a career in Nursing.

• Increase student placements to Ophthalmology.

• Promote Ophthalmic Nursing as a dynamic field of nursing, removing preconceived stereotypes.
Nightingale Oath

I solemnly pledge myself before God and in the presence of this assembly to pass my life in purity and to practise my profession faithfully.

I shall abstain from whatever is deleterious and mischievous, and shall not take or knowingly administer any harmful drug.

I shall do all in my power to maintain and elevate the standard of my profession and will hold in confidence all personal matters committed to my keeping and all family affairs coming to my knowledge in the practice of my calling.

I shall be loyal to my work and devoted towards the welfare of those committed to my care.

Lystra Gretter 1893
