The module provides an introduction to the theory and practice of managing people at work. Students will develop an understanding of the principal challenges facing managers and HR practitioners through the exploration of the key themes within organizational behaviour (OB) and the key facets of HRM. The connections between these two areas will be facilitated through an OB-focus to the lectures and the practical application of these theories to real life HR examples through seminar activities. Students will engage with cases based on real life HR / people management examples underpinned by academic journal articles and research that will be used to illustrate the lectures. Students will also actively identify how the concepts and models studied apply to their own experiences of work (where applicable).

OB-specific topics include:
- Introduction to OB
- Organization structure, design, architecture (contemporary)/ rational organizational/ work design
- Managing diverse groups, lead teams, effective teams
- Sex and gender in management
- Organizational culture and managing culture
- Managing the individual
- Perception and Personality
- Motivation/ reward/ performance
- Ethic/ Leadership/ Followership
- Politics and decision making in organizations
- Managing conflict
- Managing change

HR-specific topics include:
- Understanding the Nature of HR
- Human Resource Planning
- Managing Diversity
- Recruitment and selection
- Learning and development
- Performance management, appraisal, and Reward

Module Name: Contemporary Issues in Financial Reporting

Level: 6

Core or Option/Pathway: Core

Indicative Content: This module examines the contemporary issues and controversies in financial reporting. As such it focuses on technical and theoretical elements of International Financial Reporting Standards (IFRS). This enables students to understand how financial reporting standards are used and applied in practice. In addition the module gives insights into academic research which supports students' understanding of higher level financial reporting issues.

The module is split into two distinct areas which complement the assessment structure. The first part involves teaching of reporting standards which are a continuation of the work students undertake at level 5 in financial reporting. The concepts which are taught in this module enable students to gain a deeper understanding of the subjective elements of IFRS, thus aiding their decision-making skills. The second part introduces students to theoretical research which aids in their understanding of the contemporary issues which face the macro environment of financial accounting.

Cohorts: This module is a core module on the BA (Hons) Accounting programme

Module learning outcomes:
1. Critically appraise the strengths and weaknesses of contemporary financial reporting practices and debates.
3. Research a particular financial reporting issue, synthesising the material into an evaluative briefing paper and illustrative case study.
4. Present and defend their briefing paper and case study to an audience of peers using appropriate information technology and promoting and managing a discussion of key issues.

Module Delivery: Two hours lecture per week, two hours seminar per week, two full days (consecutively) at the end of the January assessment period for the Continuous Professional (CPD) event. Total 64 hours engagement time.

Learning prerequisites: A level 4 & 5 Financial Accounting module

Assessment: There will be two points of assessment on this module. The first will be a 3-hour closed book examination in the January period. The second will be involvement in a two-day Continuous Professional Development (CPD) event at the end of the January assessment period. Each component will be worth 50% of the total grade.

Indication for mapping: This module is designed to be both research-rich and research-led. Students are expected to engage in a significant amount of research in order to be able to create a briefing paper and give a presentation which is comparable to professional standards. In addition a significant proportion of the teaching on the module is based upon contemporary academic research. Through both a practical understanding of financial reporting...

The challenge of sustainability and a slew of corporate scandals provide almost daily illustration of the need for responsibility in business.

As a signatory of the United Nations’ sponsored Principles of Responsible Management Education (PRIME) the Faculty of Business and Law is committed to promoting responsibility in our teaching, consulting and research.

As the seventh most productive business school in the UK for publications in business ethics we have a long-standing commitment to such research and the Risk, Responsibility, Ethics and Governance research cluster brings together over seventy scholars and research students who aim to develop insightful, novel, and useful research. Colleagues working in this cluster undertake work in a wide

LESSONS LEARNT

▸ PRME is an enabler - not a driver...
▸ PRME is what you make it
▸ Don’t ask for permission (beg for forgiveness)
▸ Hearts and Minds
▸ Tap into existing activities (and budgets)
▸ Alight with key corporate goals - mission - vision
▸ Succession planning is crucial (has to be the right person)
▸ PRME can be good for your (and your colleagues) career
▸ Get involved in the PRME community!
▸ Learn from others
