## Appendix A-1: The letter of request for the accounts

13 July, 1998

Dear Sir/Madam,

I am a Research Assistant at the University of Northumbria at Newcastle and am currently investigating the extent of voluntary disclosure of accounting ratios in published financial statements. I shall be surveying the past five years accounts of The Times Top 500 UK companies, but at present I have been unable to obtain copies of your annual reports for the years 1989-1992.

I would be most grateful if you could send me these accounts, and the 1993 report when it becomes available.

Yours faithfully,

Anna Watson B.A.

## Glossary

Abbreviations used in the statistical analysis

Descriptive statistics

| N | number of observations |
| :--- | :--- |
| $\mathrm{N}^{*}$ | number of missing observations |
| STDEV | standard deviation |
| SEMEAN | standard error of the mean |
| MIN | minimum value |
| MAX | maximum value |

Mann Whitney test of independence
U the number of times a value in the first group precedes a value in the second group, when values are sorted in ascending order

W test statistic (the sum of the ranks for the larger of the two groups)

Z
indicates how the mean rank for the group differs from the mean rank for all observations

Chi Squared test of independence
$\chi \quad$ test statistic
DF degrees of freedom

Kruskal Wallis test of independence
H test statistic

## Logistic Analysis

B
estimated coefficient
S.E.

R
standard error
measure of 'partial correlation' between the dependent variable and each of the independent variables

[^0]:    ${ }^{1}$ When all those companies disclosing 4 or more investment ratios were included in a single group,
